

# TERIM

## Italian Innovation

TERIM is an Italian Home Appliance leading manufacturer, Located in Modena, Northern Italy, has been running its manufacturing business since the 60's.

# 2017

”

Modena is located in the middle of the Po valley, a strategic position, in one of the most developed areas of the country. Moreover Modena is the cradle of many worldwide recognized brands, starting from the mechanical field ending to the food industry. We are proud to have the Ferrari and Maserati Company located in Modena, the best excellences for the race sportive cars, and on the other hand to be the best producer of Balsamic vinegar. In this scenario **TERIM** would represent the perfect match between the high-performance of its products and this land of food abundance and engineering workmanship.

## AN ITALIAN STORY FOR INNOVATION AND STYLE

TERIM traces its origins back in the latest 50s when the Company was founded in Modena, Emilia Romagna, Northside of Italy.

TERIM truly Italian tale. A story of quality, of attention and love for elegant details. Of passion and constant research for new functional and aesthetic solutions.

TERIM a historical Italian brand, stood out for decades by its strong push for innovation, for the attainment and maintenance of high quality standards, for the elegance and distinctiveness of its design and Italian flair, which is increasingly appreciated throughout the world

TERIM wide range of elegant free-standing cookers, built-in hobs and ovens creates a universe in which elegance and professionalism have become daily habit; because each cooker, each oven or hob has been designed to be the extremely functional and refined Centre piece of the most beautiful kitchens. Starting 2016 TERIM extend the range to include washing machine, dishwasher and air-conditioner

**Skills:** TERIM has 50 years of experience in home appliances

**Quality:** Our products are engineered to achieve the best quality standard

**Taste:** Our products has a distinctive Italian design

**Customer orientation:** We want to satisfy our customer through the excellence of our products and the excellence of our services

# WASHING MACHINE

# 04

## WASHING MACHINE

Terim Italian washing machine and washing /dryers deliver energy and water savings while getting your clothes exceptionally clean. Quality ,reliability and innovation are the Terim mile stone to the best washing solution

### WASHING MACHINE CONTENT

## 4- WASHING MACHINE

# TECHNICAL SOLUTIONS

TERIM products are designed to meet the consumers' present and future needs.

Our products are the best synthesis of aesthetics, technology and functionality.

## TESTED RELIABLE SOLUTIONS LASTING OVER TIME

Combined with great ease of use and unique technology.

### PROFESSIONAL DRUM

The exclusive and innovative shape of the drum, with a four-arm bearing structure, ensures a stable and balanced rotation and improves washing quality and spin performance. Moreover, this structure allows the use of 4 drum paddle lifters which ensures stronger and, at the same time, more delicate washing, respecting fabrics and assuring the best washing results. The particular holes of the drum facilitate water inflow and outflow allowing perfect spraying and protection of laundry and ensuring better washing quality.

### ANTI-CORROSION CABINET, TESTED FOR OVER 10,000 OPERATING HOURS

The whole cabinet is subjected to a cataphoresis bath that makes steel highly resistant to corrosion; the treatment deposits on the surface of the cabinet a layer of epoxy resin that ensures high protection against chemical agents and provides better adhesion of the liquid paint finishing. The special panel framework of the cabinet makes the washing machine more stable even with higher spin speed, with considerable reduction of noise and vibrations for a lifetime of over 10.000 operating hours.

### PORTHOLE OPENING AT 180

The door can be opened with a retractable handle. The asymmetrical shape of the porthole is designed to gently push the laundry towards the centre at each rotation of the drum.

The porthole opening at °180 ensures maximum ergonomics and facilitates drum loading and unloading.

# SOLUTIONS AT HAND

## LCD TOUCH DISPLAY

The LCD Touch Display with unencoded texts and icons shows the selected program and the washing option. Just turn the central knob to select the desired program and lightly press on the start button to start the washing cycle. Simple and intuitive.

## LCD TOUCH DISPLAY

A magnetic device prevents the formation of limescale deposits, preserving the operation of coils, prolonging its life and avoiding the use of liquid or powders anti-limescale.

## ACQUASTOP

Besides the overflow system there is a water supply hose with integrated anti-flooding system. In case of leakage or dripping of the supply hose of the washing machine, a mechanical valve automatically stops the water flow, preventing possible floodings.

## ANTI-FOAM CONTROL

A sensor inside the drum detects the level of foam and reduces it if too high. The Easy Logic system is automatically activated by increasing rinsing cycles, ensuring total removal of detergent residues.

## LED DISPLAY

The control panel with Led indicators has an essential and elegant design. Simple and intuitive, it clearly shows the selected washing programs.

### Easy Logic

01KG 10KG

### MAXIMUM EFFICIENCY FOR EVERY WASH

The Easy Logic system, available in all our washing machines, detects the weight of the laundry and accordingly intervenes on the values of the selected washing program. This allows to wash with variable weights avoiding any waste of water and energy, with constant maximum wash efficiency and minimum consumption.

# PROTECTION FOR THE WHOLE FAMILY

TERIM cares about your health and that of your family; therefore, it has developed a series of antibacterial solutions, to give you cleaner, fresher and longer-lasting laundry. Through the use of Microban® technology we ensure constant antibacterial protection. We have also developed a special washing cycle that eliminates 99% of bacteria (e.g. Escherichia coli, Stafilococco Aureo, Candida Albicans, Aspergillus Niger) that may contaminate laundry, without using any antibacterial detergents.

## DETERGENT DRAWER AND PORTHOLE GASKET

The detergent drawer and the porthole gasket are made with Microban® antibacterial material, which prevents the formation and proliferation of bacteria, fungi and mould that may cause stains and foul odours. It also ensures stronger protection against harmful microbes, helping us keeping the surfaces of the drawer and the porthole gasket cleaner over time.

## CHILD SAFETY

All the washing machines in the LCD Touch Display have the Child Lock function, which is activated by entering a code after the start of the washing cycle. Once the protection is activated, all the controls of the control panel are inhibited, preventing accidental changing of running programs and unintentional starting of the machine after the end of the wash program.

## AUTOMATIC CLEAN AND DRY

TERIM air conditioner adopts a new generation of hydrophilic aluminum foil, under cooling or dehumidifying mode, dust in evaporator will be removed by the fast-moving condensate water.

The blade keeps operating for air drying after power off, thus achieves automatic clean and dry.

This function is available through controlling the «X-Fan» button in remote controller, caring for your health considerably.

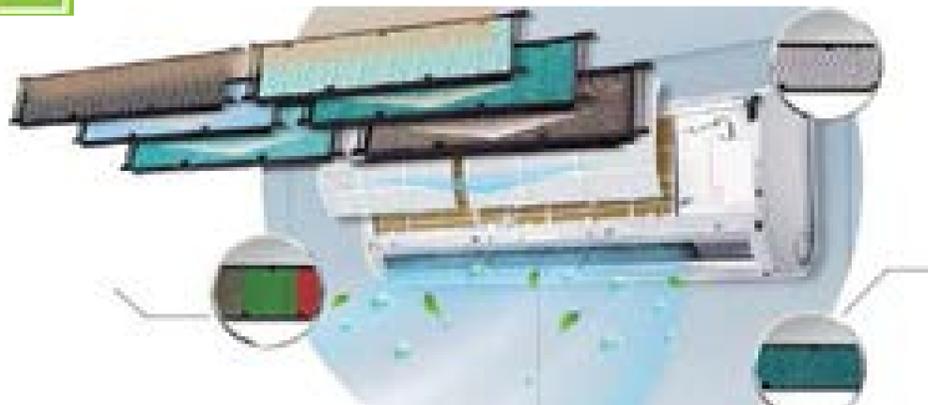

1- Water still exists in air conditioner after power off

2- Air louver keeps operating

3- Keep clean and dry inside the unit

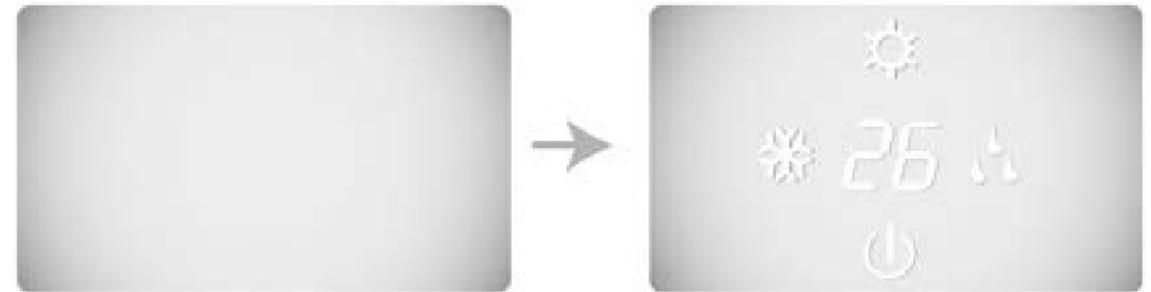

## ENVIROMENT FRIENDLY
